

AutoPrep™

Instantly e-enables ANY third-party documents for our premier Total eClose™ platform

AutoPrep can transform any PDF into a fully e-enabled document in seconds. Using AI, OCR and our patented machine learning technologies, AutoPrep scans and parses documents, locates all signature and notary regions, and automatically applies eTags for eClosing. As a result, lenders and settlement service providers can use loan documents produced by virtually any document provider with our Total eClose solution.

Scan Documents

Find Signatures

Assign eTags

Ready to eClose!

- Locates and identifies all applicable signature areas
- Detects and classifies documents requiring notarization
- Includes a comprehensive eTag toolbox

- Eliminates repetitive corrections with integrated learning functionality
- e-Enables documents in seconds
- Integrates with existing systems using AutoPrep's robust API

Many lenders are tied to systems that don't produce e-enabled documents. That's a major eClosing roadblock. AutoPrep removes that roadblock instantly, making eClosing a whole lot easier!
