

eNotary Technology

DocMagic's eNotary technology allows notaries to electronically sign and notarize documents in a secure environment. We offer proprietary In-Person Electronic Notarization (IPEN) and Remote Online Notarization (RON) technology to improve the lending process for borrowers, lenders and settlement service providers.

eNotary technology is key to the eClosing process.

Streamline your entire closing process, eliminate paper and ensure compliance with secure eNotary technology.

Proprietary technology supports In-Person Electronic Notarization (IPEN) and Remote Online Notarization (RON)

Consistent eSign experience throughout the loan process

Use your own notary, or a notary affiliated with any of the major eNotarization providers

eClose console allows notaries to manage the signing event

Integrated eJournal and access to RON recordings

Integrated identity verification with knowledge-based authentication (KBA) and credential analysis.

Access to a nationwide network of RON certified eNotaries trained on DocMagic's system

Compliant with state and federal eNotarization regulations

Over 38 years of experience with millions of electronic notarizations completed.
